

# Kindergarten Readiness Kits Made Easy

**A Success Story:**  
*Simplifying Summer Learning for Incoming  
Kindergartners*

## The Challenge

A mid-sized PA school wanted to give each incoming kindergartner a Kindergarten Readiness Kit – hands-on materials for early math, science, art, and literacy skills before the first day of school.

The educator realized sourcing materials across multiple suppliers would be time-consuming and exceed the strict grant budget.

## The Solution

C & A Educate stepped in. Our team met with the educator to understand goals and must-have kit components. We managed sourcing, procurement, and customization, keeping costs and quality optimized.

### Key Benefits:

- Complete, high-quality kit at a fraction of expected cost
- Delivered on time, within budget
- Minimal effort required from the school

## The Outcome

Only a few hours of feedback were required from the district. The educator said:

“C & A took all the effort off our hands and gave us exactly what we hoped for—better than we thought possible.”

### Why Districts Partner with C & A Educate

- Turnkey project management from idea to delivery
- Budget-aligned sourcing across trusted suppliers
- Customizable kits tailored to learning goals
- Fast, reliable fulfillment for schools and families
